

EMPLOYMENT OPPORTUNITIES

BIostatistician

At City of Hope National Medical Center and Beckman Research Institute, the same spirit that produced this dynamic organization almost a century ago still flourishes today.

City of Hope does not wait for discoveries to happen. We pursue them with an urgency driven as much by compassion as intellectual curiosity. Here, nearly 3,500 scientists, physicians, and staff are committed to the research, treatment and cure of cancer and other life-threatening illnesses. As one of just a handful of National Cancer Institute (NCI) - designated Comprehensive Cancer Centers, City of Hope offers the opportunity to collaborate with world-renowned faculty in an academic environment. Our groundbreaking research leads to lifesaving health care benefiting our patients and millions of others worldwide.

Description

Information Sciences department is seeking to hire an experienced Biostatistician. He/she will work directly with physicians working in the area of Solid Tumor cancers. Anticipated activity will include consulting with faculty statisticians and database experts as needed to ensure quality of scientific and operational methods; performing statistical analyses of clinical research data independently or in collaboration with a Ph.D. level Biostatistician, as appropriate; developing ongoing collaborations with investigators; contributing to the database infrastructure supporting clinical research; and assisting in the preparation of grant proposals.

Requirements

Minimum education required is a Masters Degree in statistics, biostatistics or a closely related field. Minimum experience of 3 years in statistical consulting and analysis, including computational data management. Other requirements include strong knowledge of statistical software packages including SAS and Splus or R, as well as other relevant tools such as advanced SQL queries, SAS Internet, SAS BI, web-related programming tools, or specialized tools for statistical computing. Relevant experience would include collaboration with medical and biological scientists and responsibility for electronic management of a
